Chapter 1. Communications Site Management Plan – Ten Sleep

This page intentionally left blank

1.1. Background

NEPA Number: DOI-BLM-WY-R010-2015-0047-CX:

BLM Office: Worland Field Office

Lease/Serial/Case File No.: Ten Sleep Communications Site

Proposed Action Title/Type: Ten Sleep Communications Site Management Plan

Location of Proposed Action:

Sixth Principal Meridian, Wyoming,

T. 47 N., R. 87 W.,

sec. 19, SE¹/₄NE¹/₄.

Description of Proposed Action:

This Communication Site Management Plan provides applicable guidance and adds current policy and technical standards for better management of the Ten Sleep Communication Site. This plan governs development and management of Ten Sleep Communications Site and will be modified in the future as needs and conditions warrant. Any future such uses must be designed, installed, operated, and maintained to be compatible and not interfere with the senior uses as defined in Section A of the plan. This site-specific plan is administrative in **nature**; no new surface disturbance is authorized.

1.2. Land Use Plan Conformance

Land Use Plan Name: Worland Resource Management Plan Date Approved: September 21, 2015

This plan has been reviewed to determine if the proposed action conforms to the land use plan as required by 43 CFR 1610.5. The proposed action conforms to the Record of Decision and Approved Resource Management Plan for the Worland Field Office dated September 21, 2015. The decisions in the Worland Resource Management Plan (WRMP) provide overall management direction for resources on BLM-administered land in the Worland Field Office, Wyoming.

The proposed action is in conformance with the applicable LUP because it is specifically provided for in the following LUP decisions:

WRMP/ROD record numbers:

6000, Manage public lands to meet transportation and ROW needs consistent with goals and objectives of other resources.

6022, Develop communication site management plans for all communication site concentration areas (Map 3-24).

6027, Authorize communication site facilities on a case-by-case basis. Encourage development within designated areas. Co-locate new communication sites where possible.

The Worland RMP (pgs 107-109) delineates preferred right-of-way corridors, right-of-way avoidance areas, right-of-way exclusion area, and area available for right-of-way. The Worland RMP states that the BLM would manage public lands to meet transportation and ROW needs by providing opportunities to meet ROW demands while protecting important resources.

1.3. Compliance with NEPA:

The Proposed Action is categorically excluded from further documentation under the National Environmental Policy Act (NEPA) in accordance with 516 DM 2, Appendix 1, 1.10 "Policies, directives, regulations, and guidelines: that are of an administrative, financial, legal, technical, or procedural nature; or whose environmental effects are too broad, speculative, or conjectural to lend themselves to meaningful analysis and will later be subject to the NEPA process, either collectively or case-by-case."

This categorical exclusion is appropriate in this situation because there are no extraordinary circumstances potentially having effects that may significantly affect the environment. The proposed action has been reviewed, and none of the extraordinary circumstances described in 43 CFR Part 46.215 apply.

I considered: this is an existing site-specific communications management plan and administrative in nature, no new surface disturbance is authorized.

1.4. Approval and Contact Information

|------|-------|---|
| Wou | ld th | e proposed project |
| | | a disproportionately high and adverse effect on low income or minority populations (Executive |
| | | 898)? |
| Yes | No | Rationale |
| | X | No low income or minority populations occur in the project area. No new facilities or disturbances are proposed under this amendment. No rights are conveyed beyond those granted by the original communications site management plan. |
| | | access to and ceremonial use of Indian sacred sites on Federal lands by Indian religious practitioners eartly adversely affect the physical integrity of such sacred sites (Executive Order 13007)? |
| Yes | No | Rationale |
| | X | No sacred sites or site types of interest, based on previous consultation, were identified. |
| | | ribute to the introduction, continued existence, or spread of noxious weeds or non-native invasive |
| | | nown to occur in the area or actions that may promote the introduction, growth, or expansion of the such species (Federal Noxious Weed Control Act and Executive Order 13112)? |
| Yes | No | Rationale |
| | X | No new facilities or disturbances are proposed under this amendment. No rights are conveyed beyond those granted by the original communications site management plan. Amendment of this communications site management plan would not contribute to the introduction, continued existence, or spread of noxious weeds or non-native invasive species known to occur in the area. No actions would be authorized under this CX that may promote the introduction, growth, or expansion of the range of such species. |
